## SUMMARY

AI-focused PM driving business outcomes through **agentic/LLM automation ecosystems**. Repeated record of shipping internal productivity tooling and cloud programs that deliver **multi-million-dollar impact**. Comfortable translating between **engineering depth and business value** to build platforms that users love and trust.

## SKILLS

- **AI & Agent Platforms:** LLMs, agentic workflows, RAG, MCP, prompt engineering, guardrails, evaluation
- **Developer Experience:** Platform engineering, docs-as-code, GitHub Copilot & extensions, CI/CD
- **Platform and Infrastructure:** Azure (apps/infra/security/identity), SLO/SLI, observability, multi-region scale
- **Product Management:** PRD, pilots & POCs (A/B tests, usability), KPIs, stakeholder communications, GTM

## EXPERIENCE

### AI Automation Product manager

October 2022 - Present

Microsoft

Redmond, WA

- Driving **development of agentic solutions** to accelerate cloud migration & modernization by ~30%; early pilots show a **75% reduction in manual effort** across design, planning, and optimization.
- Founded the **AI-enabled App Modernization Factory**, **reducing refactoring timelines by 40%** and delivering **\$600K direct and \$1M recurring revenue** across 12 enterprise customers.
- Scaled GitHub developer productivity features generating **\$700K direct revenue** and enabling **\$14M+ in pipeline** within 60 days.

### Azure Apps, Infra, and Security Program Manager

September 2019 – October 2022

Microsoft

Issaquah, WA

- **Directed global security & identity services** (team of 18), launching offerings that drove **\$6.1M direct revenue** and **enabled \$74M+** in deals.
- **Designed Azure region portability & cloud mgmt services** to ensure secure, compliant multi-region ops, **unlocking \$168M+** in contracts.
- **Pioneered remote delivery models** for mission-critical security solutions during COVID-19, preserving uptime and accelerating rollout for public sector & S500 customers.

### Azure Solutions Consultant

February 2017 – September 2019

Microsoft

Remote

- **Accelerated enterprise cloud adoption** via identity & security deployments across industries, improving readiness and time-to-value.
- Engineered config-as-code, CI/CD pipelines, and automation scripts **saving 2,200+ support hours annually and increasing concurrency by 10%**.
- **Co-led modernization of 1,700+ apps** to cloud-native architectures; guided teams on middleware integration and scaled customization.

### Software Developer

February 2016 – January 2017

Siemens Healthineers

Issaquah, WA

- Contributed to ultrasound **software dev/test; supported framework upgrades** in regulated environment.

## EDUCATION

### University of Washington, Bothell

2016

BS in Computer Science (Cum Laude, GPA 3.85)

Bothell, WA
